

PLASMA IS LIGHT

BLUESHAPE Power Station 4 and Power Station 2

DC BATTERY OPTIONS

Hive's Wasp and Bee fixtures run off 28V DC power. This means you can power them off of batteries! Hive recommends BLUESHAPE Power Station 2 and the Power Station 4 for the most reliable performance.

HIVE RUNNING ON BLUESHAPE

BLUESHAPE's Power Station 2, using two 270Wh vMount batteries, can run each of Hive's lights for 2+ hour.

BLUESHAPE's Power Station 4, using four 270Wh vMount batteries, can run 1 Hive light for 4+ hours and can also power 2 Hive lights at the same time for 2+ hours.

You can plug Hive lights directly into both BLUESHAPE Power Stations' 28VDC output with our adapter cable!
