

Cinematography and Photography Lighting Internship

Description:

Hive Lighting Inc. is an American manufacturing company based in downtown Los Angeles, which produces energy efficient lighting for the entertainment and image capture industries. Hive Lighting is looking for interns with a passion for cinematography, lighting design and photography to join our creative team. The interns hired for this position should expect to learn all facets of manufacturing equipment for the entertainment industries. This will include in depth knowledge of the technical and aesthetic aspects of lighting for camera. The engineering of optics, reflectors, lenses and light sources to create the tools used for on camera lighting. The current industry standard tools available for on set lighting. The business of equipment sales and rentals and finally participate in the marketing, promotion and customer outreach in the entertainment industry. Interns will leave this position with invaluable skills, industry knowledge and connections.

Responsibilities:

- Assist in the production of marketing materials, including video and photo production.
- Assist in product design and product testing.
- Monitor and post on blogs, forums, and social networks.
- Attend industry specific trade shows and events.
- Assist in the set up and demonstration of lighting equipment.
- Assist in onset visits and sales calls.
- Assist with customer support.
- Assist with lighting design and customer consulting.
- Assist in inventory management, materials inspection and quality control.

Requirements:

Applicants should be Film, Fine Art or Communications Major: Cinematography or Photography focus a plus, with a familiarity with basic lighting principals and terms. They should possess strong analytic and aesthetic skills, and have the ability to work independently as well as in a team.

On set experience is a plus.

Majors and Skills:

Cinematography, Photography, Graphic Design, Lighting Design, Color Correction, Fine Art, Communications, Marketing.
